

PowerBI Dashboard Course Overview

Description of On-Site Training

8 Hours

1 Trainer

Fixed Cost: \$2,500

Topics Covered

- Learn how to use Microsoft's Power BI. In the first part of the session, students will learn through a series of labs and sample data how to use Power BI Desktop to author reports.
- In the second part of the session, students will use their reports to compose a dashboard and learn to share it on the Power BI Service.
- Students will use Power BI Desktop to:
 - Connect to local data and data available in the Power BI Service
 - Create Data Models and Mash-ups: Discover and Combine data
 - Author a report
 - Create Dashboards from report elements
 - Share reports and dashboards to a Power BI Service App workspace

On Site: Our trainers come to you and train in your environment.

- You provide the venue, network connectivity, hardware, and software
