BUSINESS INTELLIGENCE AND DATA DEVELOPMENT SOLUTIONS

OVERVIEW

Microsoft business intelligence consulting and data development services for your organization from certified experts. Save money and time by engaging with our knowledgeable business and technical consultants in remote working sessions for your business intelligence support, training or development needs.

MATURITY ASSESSMENTS

Thorough assessment that starts with in-depth interviews with business stakeholders compile current strategic analysis needs by business component. Then an analysis of BI technical capabilities to fulfill the business requirements. Provides overviews of current business and technical capabilities and recommendations.

STRATEGY MAPPINGS

Analysis of the cross functional processes for impact on executive strategy from which KPIs and metrics to measure the organization's performance can be derived. Based upon requirements a horizontal or vertical analysis can be used to create a mockup of a potential balanced scorecards based on performance perspectives.

ARCHITECTURE ASSESSMENT

Technical analyses of the organizations business intelligence stack from ETL to presentation layer. Analysis includes data cleansing, governance, standards and best practices, dimensional modeling, semantic layer, OLAP storage, reporting architecture and security. Provides recommendations that will help improve stability, performance and usability.

TECHNICAL DEVELOPMENT

Focusing on the broad range of Microsoft technologies including visioning, requirements, design, development, testing, deployment and support.

- Integration Services and SQL ETL
- Analysis Services tabular and dimensional OLAP development
- PerformancePoint dashboards, SharePoint integration and development
