CUSTOMER ENGAGEMENT

### Client Management

LIS365 Customer Engagement helps you to record key client information over numerous channels and in addition aggregate data & information from all your back-office operations.

### Panels Management

LIS365 Customer Engagement provides the ability to group Tests into Panels, using the Panel management. Panel testing is also a useful tool to evaluate proficiency of laboratory technicians.

### Reports Management

LIS365 Customer Engagement has generally been characterized as a single comprehensive piece of solution that manages lab workflow, reporting and billing.

## Why Choose LIS365 Customer Engagement?

LIS365 Customer Engagement keeps track of lab sales activities through predictive analysis. It has comprehensive features that stand out to meet the demands of unique lab environments in this latest release, which includes:

- Rules-based technology, configurable rules improve efficient workflows and error-proofing.
- An interactive dashboard that allows users to view laboratory performance metrics.
- An interface monitoring tool, that includes user alerts to ensure that all interfaces are functioning as intended.
- LIS365 has comprehensive report functionality that enables us to memorize reports.
- Extremely scalable, flexible, and customizable, outstanding support and services organization.
