

# SharePoint Azure AD Connect

Synchronize your Azure Active Directory with SharePoint Online User Profile

ENTERPRISE

Compatibility:

Are you facing trouble in synchronizing your Azure Active Directory with SharePoint Online User Profiles? Use this amazing tool.

## Using SharePoint Azure AD Connect

### Prerequisites

- Your on-premises Active Directory fields should be mapped with Azure Active Directory. If you are facing issues while doing mapping, contact us and our team of experts would help you.

### Configuration

- Using SharePoint Azure AD Connect tool you can do a mapping of your Azure AD fields with your target SharePoint Online tenant's User Profiles.

### Synchronization

- SharePoint Azure AD Connect tool allows you to set a schedule for periodic synchronization of your Azure AD fields with SharePoint Online User Profiles fields.

### Technologies used in SharePoint Azure AD Connect

- Microsoft Graph API
- Azure AD
- SharePoint Online User Profile

After completion you should verify that SharePoint Online User Profiles are correctly mapped with Azure AD fields and it is working as expected.
