

## Securely share Power BI reports beyond your firewall

Binokula is a cloud-based service designed to simplify the secure distribution of Microsoft Power BI reports beyond your company firewall.

Binokula integrates seamlessly with Power BI, Microsoft's industry-leading data visualization tool, to enable one-click publishing into your dedicated and secure Binokula report portal.

Binokula's robust security layer gives you full control to easily manage hundreds of reports, users and permissions without the need to develop complex IT solutions.

## Features

- Out-of-the-box integration with Power BI
- Built to scale with your business growth
- Only pay for what you need
- Custom portal and SSO (single sign-on) options
- Live monitoring and support
- Comprehensive audit reporting
- No long-term commitments
- Approved by Microsoft AppSource

### **Not using Power BI yet?**

Binokula was developed by  
**Stellar Consulting Group**, a Microsoft Gold Partner  
for Data and Analytics.

If you're not already using Power BI, we can help you get started today.
