

# Manage your cloud.

(NOT THE OTHER WAY AROUND)

Microsoft Azure

## CloudHealth Technologies makes cloud management simple.

Migrating to Microsoft Azure promises improved agility, cost savings, and on-demand capacity, but can also be substantially more complex to manage than on-premises data centers. Management and security tools traditionally built for data centers won't necessarily work in new cloud environments and, as more users ramp up, it's easy for cloud usage to spin out of control. Cloud Service Management tools can help. CloudHealth gives organizations a new, more efficient way to visualize, optimize, and automate their cloud environments.

“When we entered the digital world, we didn't have a good view into our cloud spend. All finance saw at the end of the day was a bill, and the bill was rising every month... CloudHealth tells us which environments can be shut off outside of business hours, saving us more per month.”

- Russell Bradford, Cloud Platform Manager, NewsUK

## Let CloudHealth be the single pane of glass for your Azure environment.

Every IT infrastructure is different. There is no end to the complexities and demands of varying applications and assets, but complexity can be simplified. CloudHealth monitors your accounts, applications, assets, and services and calls your attention to opportunities for automation.

### SEE WHAT YOU GET WITH CLOUDHEALTH

#### VISIBILITY

In large Azure environments, even in the best case scenario, it's common for the right hand to lose track of what the left hand is doing. CloudHealth brings global consolidated visibility and on-demand reporting across your entire cloud environment so you can identify and manage issues before they become problems.

#### OPTIMIZATION

Many organizations turn to Microsoft Azure cloud-based infrastructure to achieve efficiency and cost savings. But you won't accomplish these goals without cloud optimization—constant tuning, managing and automation of your assets. With CloudHealth, driving efficiency no longer requires labor intensive manual alterations—Instead, you can automate workflows, programmatically tune your infrastructure and see your entire environment in one pane of glass. The result is a cost and performance optimized architecture that scales without added complexity.

#### GOVERNANCE

You can't control billions of data points — but CloudHealth can. With multiple users across many departments deploying new services, applications, and assets, the rate of change is beyond the scale of human management. This makes manual evaluation, analysis, optimization, and reporting difficult, if not impossible. CloudHealth automates and controls assets based on enforcing business policies and governance definitions set by you.

AS YOUR CLOUD SYSTEM GROWS, SIMPLIFY IT.

1

#### CONSOLIDATE

Consolidate cloud infrastructure + data

2

#### EVALUATE

Create dynamic business perspectives

3

#### ANALYZE

analyze usage, cost + performance by business perspectives

4

#### OPTIMIZE

recommend + execute for optimization

5

#### AUTOMATE

automate + define business policies

## What can CloudHealth do for you?

### Cut costs

- Save 10-20% on cloud expenses starting day one
- Keep your cloud continuously optimized

### Go faster

- CloudHealth customers reclaim hundreds of hours per year
- Manage and understand cloud performance

### Reduce risk

- Governance simplified – create rules to manage infrastructure
- Stay ahead of vulnerabilities before they cause problems

### Manage complexity

- Rightsize millions of instances with one click
- Tame shadow IT with visibility across all users

## Ready for a cloud health check?

Every day that goes by without CloudHealth is money wasted. Let us help you make your cloud environment more efficient.

If you'd like to learn more about CloudHealth and how we can help, all it takes is 20 minutes. Let us walk you through our platform and show you how we can help optimize and control your cloud. Visit us online at [cloudhealthtech.com](http://cloudhealthtech.com) or call 617 986 3900 to schedule your demo.

“CloudHealth is a superior cloud management solution—from both a product and support perspective. Nothing in the market comes close to CloudHealth.”

– Ron Fuller, Director Web Services, Mentor Graphics
