

DRaaS

Your Disaster Recovery Plan,
Taken care of!

Are you maintaining and updating your Disaster Recovery solution?

When was the last time you tested successfully?

How cost effective is your current DR solution?

What is DRaaS from cubesys?

cubesys Disaster Recovery as a Service (DRaaS), built on Microsoft Azure, provides a comprehensive, flexible and cost-effective DR solution. Fully orchestrated DR plans safely spin up your environment when disaster strikes, so you can continue doing business.

Why customers use DRaaS?

- Based on Azure
- Protect critical applications
- Remove costly 2nd Data Centre
- Compliance
- Regular DR Rehearsals
- Rapid Recovery Times

Backed by Microsoft Azure

- Azure; the worlds most trusted cloud.
- Replicate your workloads to Azure and enable new capabilities.
- Secure and continuously monitoring from Azure.

Maintain IT Governance

Orchestrated Recovery

- Fully automated failover plans
- Push button recovery
- Tested and validated anytime
- RPO and RTO of mere minutes

Build Secure, Production ready workloads

Reduce Costs

- A fully managed solution
- Remove costly 2nd Data Centre
- Flexible monthly fees
- Minimal upfront investment

Monitor & Control your Cloud deployments

"The Azure platform stood out to us for its flexibility, multiple sites, security, and its good partnership with cubesys."

- George Tzikas, Senior IT Infrastructure Specialist,
Port Authority of New South Wales,
