

WE HAVE THE FORMULA FOR BETTER STUDENT OUTCOMES

Imagine your graduation rates if students were as engaged to learn in the classroom as they are at home on their smartphones.

IT'S TIME TO REDESIGN LEARNING

Outside the classroom, students are eager to learn about anything that interests them—by viewing online videos or interactive tutorials, or even by playing video games. But that eagerness to learn doesn't always translate to the traditional school environment.

The CuroGens Learning solution is unique in that it enables teachers to assign only coursework that a student doesn't already know. This prevents boredom. Teachers also present courses in a flexible, non-linear timeline through a variety of media. And this promotes engagement.

Increased engagement is the key to transformational learning. When there is no frustration of falling behind or boredom from redundant coursework, an at-risk student can develop a newfound interest in school. This results in fewer dropouts, increased test scores and higher graduation rates.

WHAT IS THE CUROGENS LEARNING SOLUTION?

An educational design and technology firm, CuroGens Learning is working to transform traditional teaching and learning practices by empowering educators to create personal learning environments that promote student engagement. Our mission is to help school systems around the globe improve outcomes while also seeing a better return on their learning technology investments.

Built for educators by educators, our technology solution is an advanced learning management system (LMS) based on education theory and science, years of teaching experience, and innovative software design. The sum effect of the LMS plus a professional development program for teachers is graduation. It's a new formula that is long overdue.

The question is, now that students have all of the knowledge and skills they want at their disposal via technology, how are teachers going to be part of their digital worlds?"

- Ole Hjorth, Chief Learning Officer
CuroGens Learning

PROFESSIONAL DEVELOPMENT PROGRAM

We understand that district budgets and teacher workloads often don't support ongoing professional development. Our Program incorporates ongoing development and support, as well as the sharing of information among peers, through an online forum of users.

This also helps educators save resources on course research and preparation so they have the time to better mentor and connect with each student in need.

ADVANCED LEARNING INFORMATION SYSTEM

Our proprietary LMS is the adaptive technology that powers our solutions. After an initial training series, teachers are certified in using the solution to create personalized learning environments.

Not a typical LMS, it's the scalable vehicle by which every teacher or trainer can be a creator and distributor of self-authored, digitally-based learning content that facilitates student success.

FEATURES

Media Converter

Our open-ended content authoring tool empowers teachers to upload course materials and forget about separate converters, cumbersome upload processes or compatibility issues.

Interactive Plugins

Vary coursework by accessing a library of plugins to train students not in memorization, but in knowledge transfer through advanced modalities such as game-based learning or real-world simulations.

Dashboard Manager

Experience the value of diagnostic analytics that you've never seen in a standard LMS. Dashboards focusing on learning progress instead of performance are visualized simply for a variety of audiences.

Course Director

Create educational courses that match students' expectations of media variation and interaction. This also allows the opportunity for students to take course modules in the order they want.

Learning Zone Promoter

Based on recognized pedagogical science, consistently keep any student in his or her Zone of Proximal Development (ZPD). There will be no more skilled students who are bored or challenged students who give up.

Teachers' Forum & Marketplace

The knowledge exchange platform will help teachers stay updated about e-learning, e-didactics and more, as well as collaborate with peers 24/7, and share or sell digital courses.

CuroGens Learning is a strategic formula of learning management technology and teacher professional development.

The combination effectively addresses the attention management and engagement needs of students at risk of not graduating.

Program Benefits for Students:

- Supports natural learning patterns
- Increased drive to succeed
- Motivation to learn
- Enthusiasm for life-long education

Program Benefits for Teachers:

- Better enabled to help students succeed
- Increased career satisfaction
- Ability to mentor instead of manage
- Ongoing professional development
