DSI® ScanWorkX® for Microsoft Dynamics AX/365

REAL-TIME INVENTORY VISIBILITY, ACCURACY AND EXECUTION

ScanWorkX®

Realize Maximum Value and Efficiency in Dynamics 365 for Operations

DSI® ScanWorkX® automates Microsoft Dynamics 365 for Operations through accurate, efficient mobile data collection and analysis. DSI's unmatched experience building fully-integrated supply chain applications in Dynamics 365 for Operations enables you to increase productivity and efficiency. Allow DSI ScanWorkX to extend efficient, highly-functional enterprise tools into your employees' hands.

Optimize Your Supply Chain Execution

- Empowering mobile users with mobile supply chain functions increases efficiency and accuracy and reduces cost

- Paperless task handling decreases errors and overhead while providing flexibility to adapt to dynamic daily requirements

- Real-time validation, user direction, and detailed transaction logging enforce accountability and responsibility

- Integrated inventory status, blocking, and quality inspection processes ensure regulatory compliance and reduce procedural errors

> "The implementation, deployment and maintenance costs for ScanWorkX resulted in quantifiable savings, and the solution is providing ongoing benefits to the company."

Supply Chain Mobility Meets Microsoft AppSource

DSI ScanWorkX was the first mobile data collection software selected as a Microsoft AppSource curated solution. Find out how you can easily deploy and integrate DSI ScanWorkX into Dynamics 365 for Operations with security and dependability through AppSource.

Why Choose DSI ScanWorkX?

- Best-in-class HTML5 interface, plus full-featured Windows Mobile/CE/ Embedded client for legacy hardware

- Supports standard and advanced warehouses, or a hybrid approach

- Flexible configuration tailors the software to your business processes without expensive modifications

- Configurable smart barcodes, lists of values, and auto-complete logic significantly reduce data entry time

- Add additional form fields and modify label contents without paid modifications

- Built from the ground-up specifically for Microsoft Dynamics AX/365

- 24/7/365 software and hardware support through DSI's Customer Success Center
