

Master Planning - 1 Day Workshop

Tailored Dynamics 365 for Operations workshop

In addition to its own distinct settings, the master planning module in Dynamics 365 interacts with a majority of the ERP's other modules. This class, provided by Dynamic Consulting, will help both beginner and advanced understand these complicated parameters and get the most out of their powerful scheduling engine.

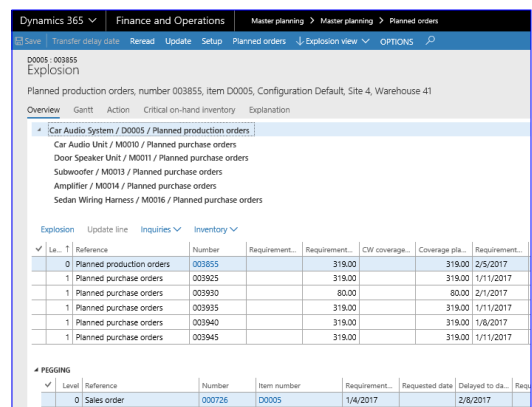

This class presents material via PowerPoint slides designed by Dynamic Consulting with context provided by an expert instructor. A series of examples will also be explained and demonstrated in a standard Contoso virtual machine provided by Microsoft that provides knowledge and experience that can easily be transferred back to each attendees environment.

Prior to the engagement, a brief discovery call will be completed in order to more specifically tailor the presentation to problems or situations that are of particular importance to your staff.

Whether you're new to Dynamics 365 master planning, or you're trying to fine-tune some of the more complicated functionality, this class is for you!

What do I get?

- Hour-long discovery session to tailor the classes to your needs
- 1 day of expert-led on-site classes
- Live walkthroughs for examples and additional questions
- Question and answer sessions to ensure the attendees' concerns are addressed
- Consolidated binders containing the following:
 - PowerPoint slides presented during classes
 - Examples run against Contoso VPC

The screenshot shows the Dynamics 365 Master Planning interface. The top navigation bar includes 'Dynamics 365', 'Finance and Operations', and 'Master planning > Master planning > Planned orders'. The main content area displays an 'Explosion' view for item '003855'. The breadcrumb trail is 'Car Audio System / D0005 / Planned production orders'. Below this, a list of sub-items is shown: 'Car Audio Unit / M0010 / Planned purchase orders', 'Door Speaker Unit / M0011 / Planned purchase orders', 'Subwoofer / M0013 / Planned purchase orders', 'Amplifier / M0014 / Planned purchase orders', and 'Sedan Wiring Harness / M0016 / Planned purchase orders'. A table below the list shows the explosion details with columns for 'Explosion', 'Update line', 'Inquiries', and 'Inventory'. The table has columns for 'Level', 'Reference', 'Number', 'Item number', 'Requirement...', 'Requested date', and 'Delayed to da...'. The data rows show planned production orders and purchase orders for various components.

Explosion	Update line	Inquiries	Inventory
Level	Reference	Number	Item number
0	Planned production orders	003855	
1	Planned purchase orders	003825	
1	Planned purchase orders	003930	
1	Planned purchase orders	003935	
1	Planned purchase orders	003940	
1	Planned purchase orders	003945
