

expandit 365 Time

– get paid for the time and material you use

ExpandIT 365 Time makes it easy to register time and material on multiple projects even when you are in remote locations.

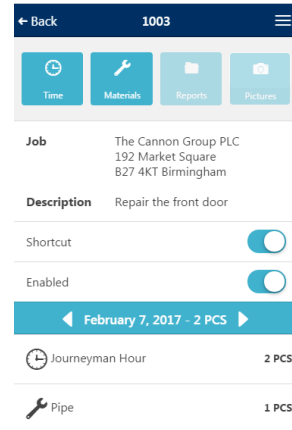

Reliable and exact information

ExpandIT 365 Time is designed for consultants, team workers and project workers who work away from their office and register the time and material spent on each project or customer visit. Many service organizations use time and material registrations as the basis for customer invoicing. Therefore, it is essential to get reliable and exact information registered on each project activity as well as it may reduce or remove efforts later wasted on solving inconsistency between the customer's and your perception of completed activities on a project.

Integrate with Microsoft Dynamics

ExpandIT 365 Time has a standard integration with Microsoft Dynamics 365 for Business Central, Microsoft Dynamics NAV and Microsoft Dynamics 365 for Business and Operations, Enterprise Edition. You can utilize the information already available such as customer, resource, project and activity information.

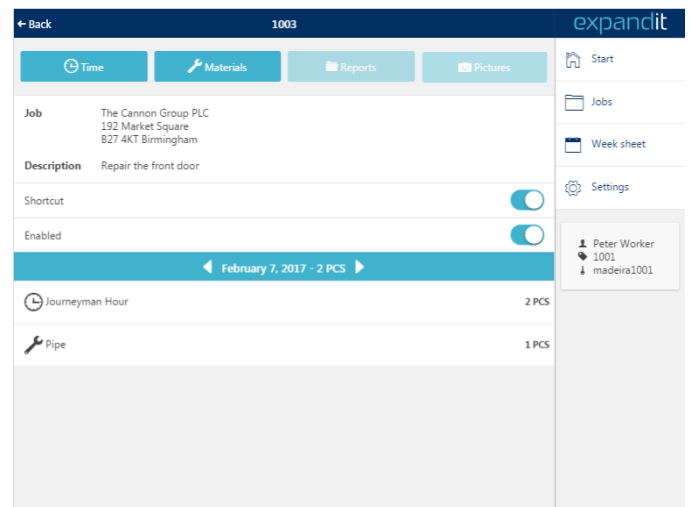

The benefits

The users, for example the consultants and project personnel, are efficient and use their resources on projects and keep the right work focus. All hours and materials are recorded against each single project. Even the customers will be satisfied because of the transparency and good documentation.

Work on favorite device

Your employees can choose their favorite hardware – phone, tablet, laptop or desktop.
