Datamart Cloud

for Microsoft Project Online with Power BI Pack

www.fluentpro.com

Product Overview

Datamart Cloud

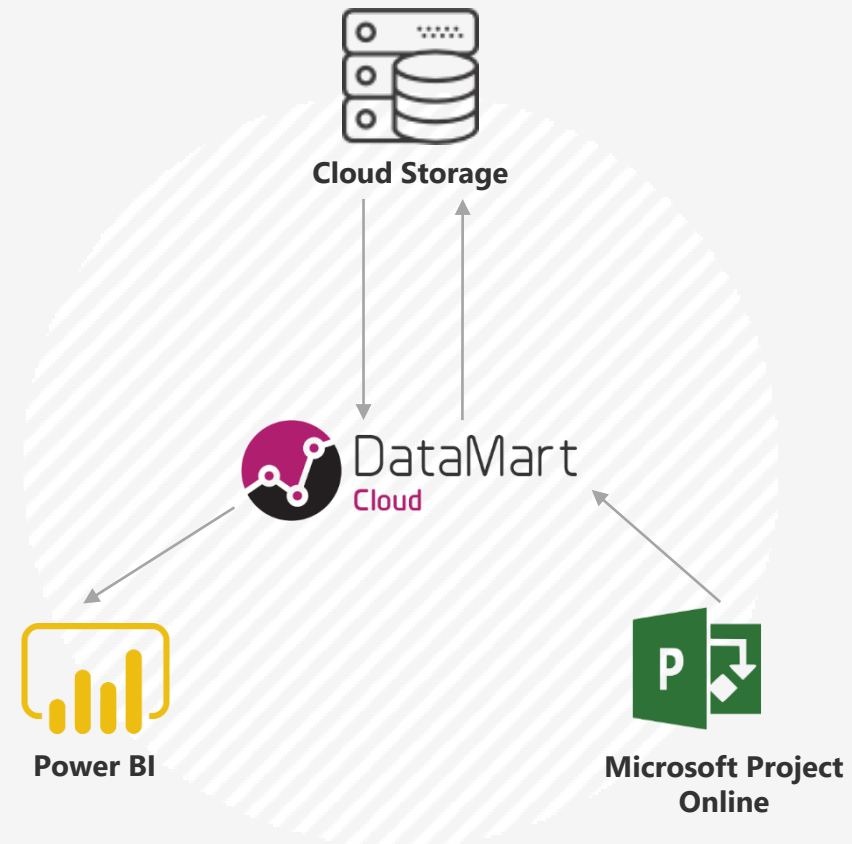

Business intelligence solution for Microsoft Project Online based on Power BI platform

Datamart is a middleware that constantly downloads data from your Project Online PWA (projects and SharePoint), performs post processing for simplified reporting and supports data snapshotting of Project and SharePoint Data for trending and historical analysis.

Reporting Interface: OData

Datamart comes with a complementary reports pack for Power BI created by FluentPro professionals, includes over 30 reports.

www.fluentpro.com

Available Integration Scenarios

Datamart Cloud

Data sync scenario	Scheduled sync	Manual sync
Microsoft Project Online -> Power BI	Yes	Yes

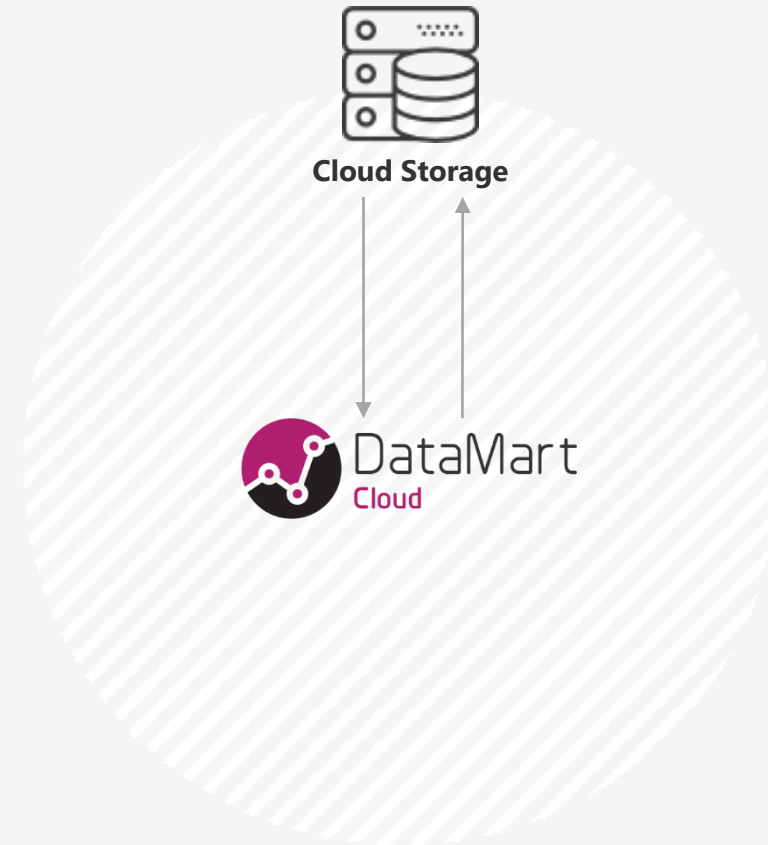

Data Schema

Datamart Cloud

Data schema is very close to Project Online one.

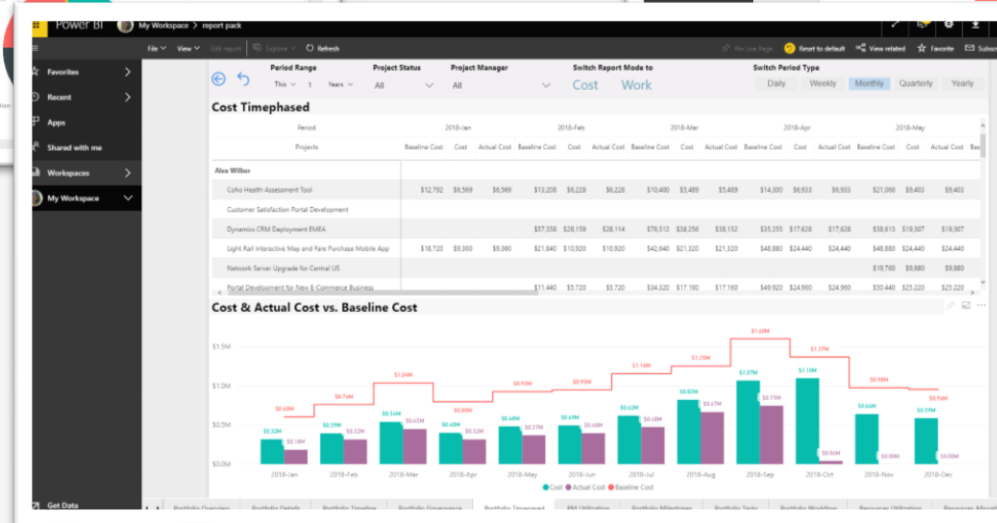

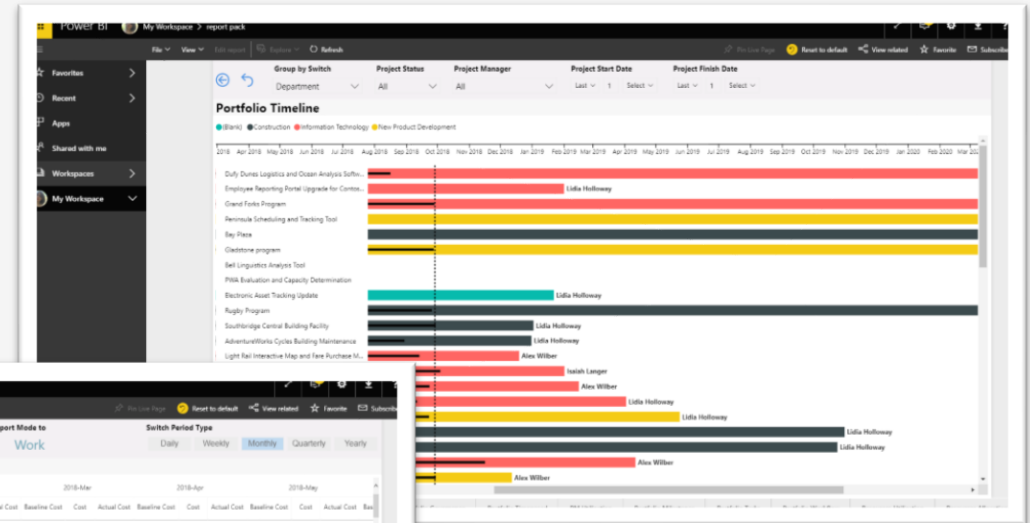

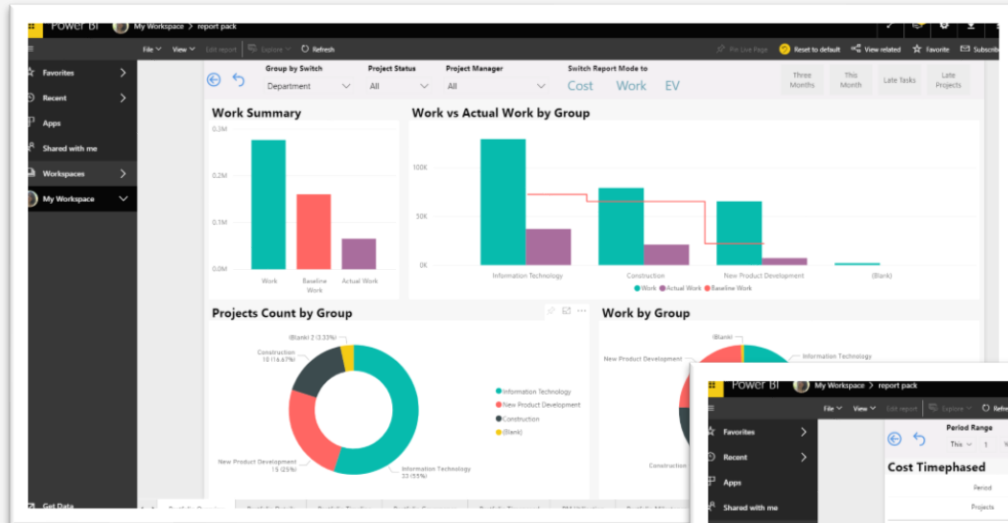

We designed schema to be very similar to one provided by Project Online but it is extended with additional attributes and made user friendly

SharePoint data is stored in a large flat entity, with Project UID, Site UID, URLs, List name, Item ID and data in columns for simplified reporting
