

CRM UPGRADE AUDIT

1 Week Assessment

When every upgrade there are technical and data challenges to navigate as well as new features and modules to explore and take advantage of. In this upgrade audit, Fullscope will review your current system from a functional and technical standpoint to give you options and plans allowing you to upgrade and move into a 100% Microsoft best practice deployment. This assessment is perfect for anyone using a Dynamics CRM solution that is considering or facing an upgrade. From the assessment, you will walk away with a technical and function review, a risk analysis and plan to move to the current version of Dynamics 365 on premise or online.

How Edgewater Fullscope is Helping Customers

Edgewater Fullscope is an award-winning Microsoft Dynamics partner, with over 10 global and national Microsoft awards. We help executives in industries like manufacturing and professional services improve their CRM initiatives with best practice driven business outcomes methodology. We also have unique adoption and training services to ensure your firm understands and embraces the latest technologies, ultimately providing improved levels of service for your customers.
