

Blockchain is an Enabler for Your Business Transformation

Blockchain has the potential to transform today's businesses with a new economy model known as "Trust Based Economy" which brings agility to businesses, while disrupting the traditional business models where the intermediaries play a major role. Its unique attributes include:

- Providing de-centralized ownership of common data
- Securing each transaction with cryptography such that only designated data owners can read or modify particular data
- Presenting a single version of truth across all stake holders
- Preventing unauthorized changes to business agreements

However, as a CXO, you may wonder, how blockchain will help my business and where do I get started.

GAVS' 1-week Blockchain PoC powered by Azure Blockchain As a Service (For Backend) and Powerapps (Distributed App) front end, enables you to take a dive into the Blockchain and explore its usage.

Our approach which is driven by tools and processes includes,

- Identifying your path in the current journey with respect to Blockchain based transformation
- Assessing your organization's starting and destination paths as part of Blockchain journey

- Whiteboarding best possible use cases
- Getting a 360-degree view of, how the use cases will be realized when implemented using Blockchain
- Providing a look & feel proof of concept which gives you a bigger picture
- Required training to your employees about the use of Blockchain

Our 1-week PoC is a packaged version of our entire Blockchain services in a box, such that you get to know the big picture without spending lot of time, money and effort.

One of the unique aspects of our Blockchain journey is that we don't necessarily have to "Boil The Ocean", because most of the misconception about the Blockchain is that it is only meant for end consumers (like a public Blockchain) or useful for very large enterprises, rather our approach takes you through a journey, where by self-contained and realistic use cases can be tried before going to transformative use cases.

Services:

Our Blockchain services include:

Blockchain consulting services: Journey mapping assessment, use case identification, work shop & training.

Blockchain execution: Proof of concept, co-innovation and production implementation.

Our Blockchain consulting and execution services are supported by a set of unique tools and platform, which you will experience during the PoC.

GAVS' Blockchain services are powered by:

- Azure Blockchain as a service: For providing the Blockchain infrastructure and integration eco system
- Microsoft Powerapps: To provide high performance and low code driven Dapps for businesses to quick realize the potential of Blockchain.

However, for production implementation, the solutions can easily be converted to customer's preferred platforms.

Sign up today for starting your business transformation using Blockchain enabled by GAVS' tools & platform and consulting approach.

About GAVS

GAVS Technologies (GAVS) is a global IT services & solutions provider enabling digital transformation through automation-led IT infrastructure solutions. Our offerings are powered by Smart Machines, DevOps & Predictive Analytics and aligned to improve user experience by 10X and reduce resource utilization by 40%.
