The benefits of cloud solutions are rapidly transforming the way organizations operate. Successful organizations have strategies for growth. Whether it is flexibility, scalability or increased collaboration, cloud solutions are quickly improving operational agility around the world.

Hitachi Solutions is partnering with organizations around the world in an effort to maximize the value of their software investments.

Our proven assessment methodology for migrating to MICROSOFT DYNAMICS 365 FOR FINANCE & OPERATIONS helps you analyze the functional and technical gaps between your current Microsoft Dynamics solution and your business objectives.

We want to educate and help you envision how this upgrade will impact your business, and not just provide an analysis of a technical upgrade. This assessment will help you determine the best path to migrating to the cloud and deliver an action plan to do so.

Objectives

- Educate and envision
- Analyze technical hindrances to migration
- Assess solution fit gap with 1-3 example processes
- Showcase upgrade benefits

Deliverables

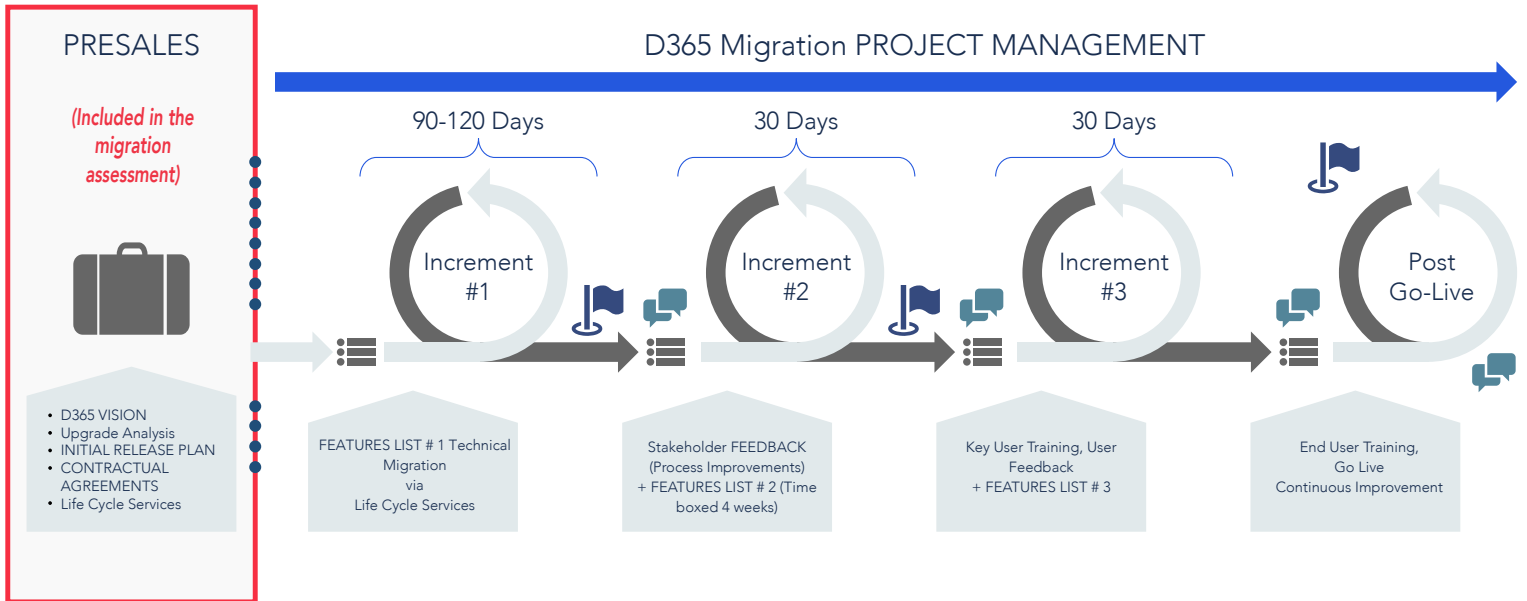

At the conclusion of this assessment, your organization will have a holistic view of your Microsoft Dynamics solution that will streamline the migration process. You will receive a:

- Solution Architecture Document
- Detailed ROI Calculation using the Hitachi Solutions & Nucleus Research® D365 ROI Financial Modeling Tool
- Separate costing for Technical Upgrade vs Productivity Improvements
- Lifecycle Services (LCS) Upgrade Analysis Report with architectural recommendations
- D365 Demo Environment with PoC for one template process

ABOUT US

Hitachi Solutions America, Ltd. is a business application consulting firm and trusted provider of vertical industry solutions built on the Microsoft Cloud. We are passionate about helping our customers successfully compete and thrive. Hitachi Solutions offers a comprehensive analysis and architectural and business assessment to migrate your core business solution to D365. Let us work with you to help you make the right choices and reduce your costs in your ground to cloud D365 migration.

GROUND TO CLOUD PROJECT MANAGEMENT

WHAT DOES D365 MEAN TO YOUR BUSINESS? Opportunities with an Optimized Cloud Solution

- Eliminates current manual or Excel based processes
- Provides increased usability, adoption, and access across any device
- Avoids customizations, leveraging standard capabilities
- Delivers lower cost of ongoing maintenance, infrastructure updates, and more
- Offers cost reductions in development and provides additional features through Cloud-based tools including Power BI, Power Apps, Flow, and the CDS (Common Data Service)

HITACHI SOLUTIONS' PARTNERSHIP WITH NUCLEUS RESEARCH®:

This partnership is part of our commitment to Cloud solution innovation and development in supporting our customers' business growth and advancement.

Together with Nucleus we have created the Microsoft Dynamics 365 ROI Financial Modeling Tool, a groundbreaking new Dynamics 365 ROI calculator.

As part of this assessment, you will receive a detailed ROI Calculation which provides a comparison of your current version to Dynamics 356 using metrics such as days to close a month, complete and on-time delivery percentages, inventory accuracy, and more.

Proven Assessment Approach

ENVISIONING

Deliver envisioning workshop to introduce the current version of Microsoft Dynamics 365 for Finance & Operations and discuss its benefits.

TECHNICAL UPGRADE ASSESSMENT

Assess the current implementation and analyze technical hindrances to upgrading.

FUNCTIONAL ASSESSMENT

Conduct fit-gap analysis of business requirements and environment. Determine adequacy of the latest release of the Microsoft solution.

IMPLEMENTATION PLAN

Develop customized plan to upgrade your ERP solution to the new Microsoft Dynamics 365 for Finance & Operations.
