## AGENDA

### Week 1

- Identify master data domain for analysis based on business needs.
- Meet with key business users and IT staff to review business issues identified for the chosen domain area.
- Review business processes and business terms associated with this domain and identify the major data source.

### Week 2 & 3

- Profile data from the identified data source and review data quality issues with key business and IT staff.
- Document data quality issues.

### Week 4

- Package findings and recommendations on data quality.
- Executive Presentation including proof of concept proposal.
