

E-Procurement

Minimize lead time from identification of a material requirement to its receipt in your stores

IDOS E-Procurement workflows are integrated with your accounting modules which significantly increase the process efficiency and reduce the manual efforts

Automate RFQ generation basis requisition raised & stock levels

IDOS provides 360 degree view of stock status, previous orders placed with vendors and quotations received whenever a new purchase requisition is raised. Thus eliminating the need for navigating to various modules before RFQ can be raised.

Track E-RFQs and compare E-Quotations

You can track status of RFQs raised and quotations received from anywhere at anytime. Quotations can be compared and L1 vendor can be selected in the system. Vendors also get an intuitive screen to view and respond to RFQs and send quotations.

Never miss a chance to get the best value from vendors

Reduce inventory carrying cost and ordering cost

Stay on top of your production planning and budgeting. Order the right quantity in the right frequency, thus ensuring you never face the over-stocking or stock-out situation.

Achieve the twin objective of efficiency and cost optimization

Enhance process efficiency in Procurement

- Raise purchase requisition basis Re-Order Level & EOQs
- Automation of RFQs and POs to vendors
- Compare quotations and select the best price
- ROL alerts and reminders
- Reduce inventory carrying cost and ordering cost
- Create GRN for stock receipt + added analytics

Complete audit trail

IDOS creates complete audit trail of all the activities and approvals from purchase requisition to material receipt to payment processing. Excellent drilldown capabilities ensure tracking at one click.

Audit trails ensure ease in monitoring and control

Our procurement process was completely un-organized and in-efficient and led to multiple stock-out situations and buying from new vendors at higher prices in emergency situations. With IDOS, we are able to track our stocks, procurement and production and at the same time, bring more opportunities on table for vendors through the vendor engagement screen.

Beverages Manufacturing Company

IDOS automates your Procurement process and provides value added analytics

IDOS automation results

- Satisfied businesses and dealers
- 54% reduction in inventory carrying cost
- Significant reduction in lead time

Powerful integration with O365 Power BI

- One click data transpose to O365 Power BI
