IMAGINET'S APP MODERNIZATION AND MIGRATION SERVICES
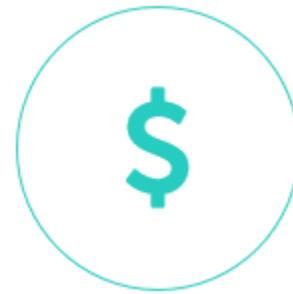

Modernized Applications. *Powered by Azure.*

Applications evolve over time. Just like businesses, an application must be evaluated, changed, and possibly be reinvented to take advantage of innovative business practices, new technologies, or to change the operational costs of using the application.

Are your legacy applications holding your business back?

The introduction of new application environments such as Microsoft Azure offer new cloud platform alternatives upon which to modernize and migrate legacy applications.

With **Imaginet's 10-Day App Modernization and Migration Workshop**, our Azure Professionals will accelerate your Application Modernization and Migration efforts, while at the same time, adding in the robustness and scalability of cloud technologies. Our deep technical skills and expertise with Microsoft Azure enables your organization to develop software applications that add functionality, scale dynamically, and cost you less to build and run over their lifetime.

Save Money
by Eliminating Hardware Costs

Dynamically Scale
to Support Changing Needs

Save Time
needed to procure/maintain hardware

Improve Focus
on delivering business value

Imaginet's Modernization & Migration Workshop
10 Day Workshop for $15,000 USD

Imaginet's 10-day App Modernization & Migration Workshop is typically structured as follows. This approach has proven successful with a variety of organizations, from small start-ups to the largest multi-national corporations.

Our Workshop includes 3 main components:

💡 Application Assessment

Imaginet will lead an evaluation of the business problem solved by an application, what organizations and individuals are affected by the application, infrastructure dependencies, total cost of ownership (TCO), and possible modern architectures that could be applied to the application. As part of the assessment Imaginet will utilize our Cloud Decision Framework to ensure that the legacy application is well suited to Azure.

🎬 Application Pilot in Azure

Imaginet will configure the Azure environment for your selected Pilot Application and connect it to your organization's on premises network. Application changes/code rewrites are performed to allow the application to meet all current business requirement and architected to run within Azure.

✏️ Roadmap & Next Steps

Once the pilot is complete, Imaginet will provide a roadmap and next steps to migrate and modernize your entire application(s).

App Modernization & Migration 10-Day Workshop

DAY 1 Kickoff, Workshop Planning	**DAY 2** Application Assessment
DAY 3 Technical Architecture Assessment	**DAY 4** Azure Environment Setup & Configuration
DAY 5 POC: Application Architecture Changes	**DAY 6** POC: Application Code Changes
DAY 7 POC: Application Code Changes	**DAY 8** POC: Application Deployment & Testing
DAY 9 POC: Application Final Testing	**DAY 10** Finalize & Review

ROADMAP AND NEXT STEPS

"Imaginet is the easiest and most knowledgeable technical partner to work with. They spend time to understand your business and help you implement the best solution for your customers. You can't find an agency that is more responsive or provides more quality information than Imaginet."

– ALI ISHAM, Marketing Director, Overhead Door Corporation
