

# Productivity Application Services

## Power BI and PowerApps

### Business challenge

Millions of companies around the world have deployed Microsoft® Office 365®. To make the most of the investment, applications need to be maintained, productivity must be monitored and supported, and upgrades should be timely and minimally disruptive.

### Our solution

Insight Productivity Application Services help you take full advantage of the advanced workloads of Office 365. Our Accelerator programs facilitate fast and effective implementations or customizations. Our CoPilot program offers ongoing white-glove support services.

#### Accelerator programs

- Comprehensive yet speedy discovery process gives us a strong baseline to work from.
- Design workshops are collaborative and led by Insight experts.
- We provide all of the services and tools needed to accomplish your fast-turn project.
- We leverage proven processes and frameworks to execute with quality and precision.

#### CoPilot program

- A dedicated Insight “CoPilot” helps you tackle challenges and drive outcomes.
- Self-service and a centralized portal accommodate service needs 24/7/365.
- Backlog management ensures functionality and keeps your IT teams focused.
- Meetings and reports give you better visibility and strategic insights.

### Drive maximum value.

Your application environment has immense potential to empower your workforce and transform your business. Productivity Application Services are a vehicle to meaningful outcomes.

### We help you advance.

By using a proven methodology, the application environment is consistently functional and users are highly productive.

Users are getting the support they need. The application ecosystem is providing clear and obvious business outcomes.

There’s an unbreakable link between the business and its application environment; they work together to transform and excel.

### Benefits

- Automate processes and streamline workflows.
- Increase visibility and business intelligence.
- Get expert support with reports and dashboards.
- Customize and build applications to support business objectives.
- Increase returns on your Microsoft® investments.

### Our partners

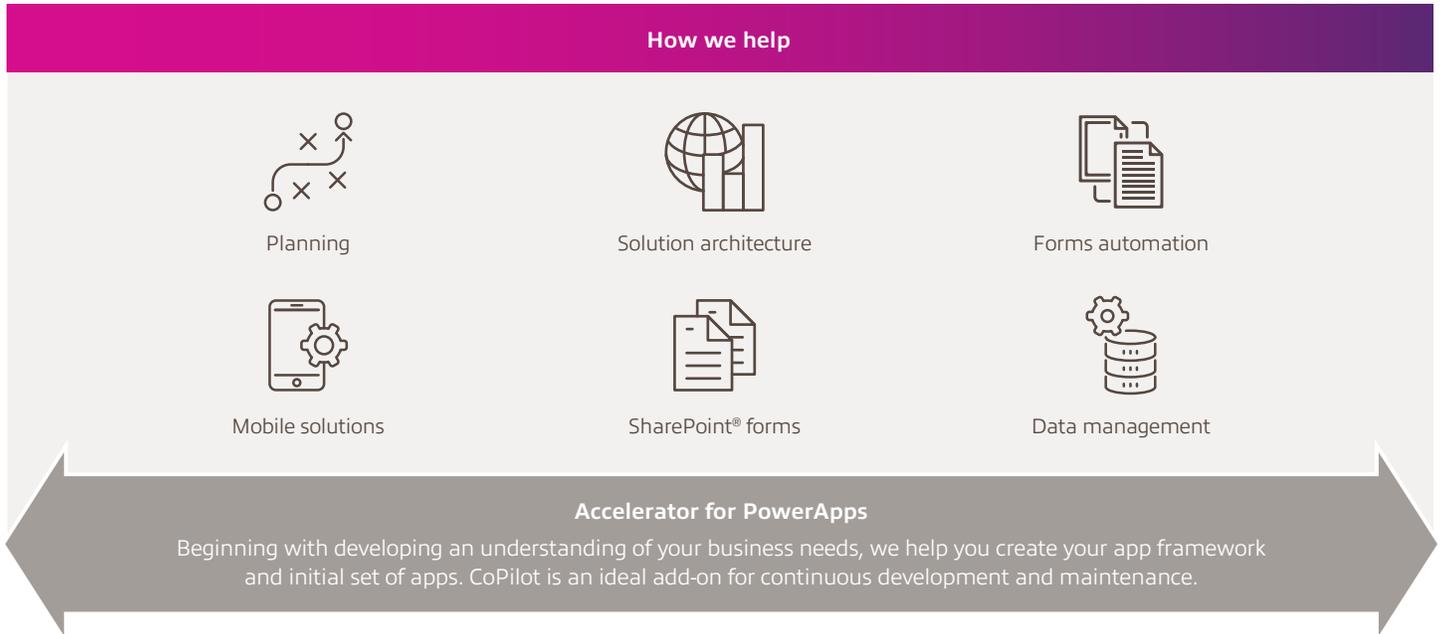

### Related services

- Managed Office 365
- Managed Desktop Services
- Device as a Service
- Workplace Services
- Service Desk

## PowerApps services

Build or maintain custom applications. Leverage other advanced Office 365® capabilities to track usage and performance.

## Power BI services

Create or modify visualization models and dashboards to increase business intelligence and support better decision-making.

### How we help:

- Dashboarding
- Data model updates
- New data sources
- Plan for data projects

### Accelerator for Power BI

Large amounts of data or a lack of skill doesn't have to be an obstacle. Leverage our service and expertise to quickly build and maintain your reports and dashboards. Our CoPilot program helps you ensure performance and continue report development.

## A true end-to-end partner
