

JUMPSTART

SAP INTEGRATION PACKAGE

Gimmel

Microexcel®

#1

Do you need better access, lifecycle management, and governance of your SAP documents?

#2

Are you paying exorbitant maintenance fees for an ECM platform only to make your SAP documents more accessible?

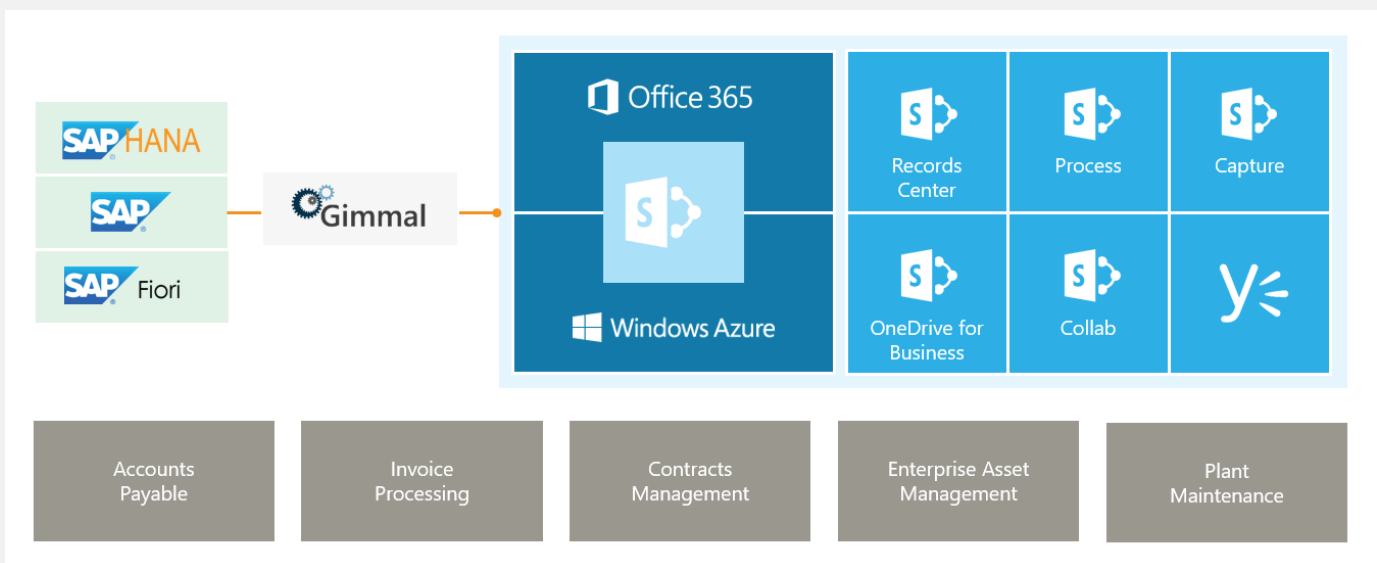

#3

Are you looking to move to SAP HANA and need a cost effective solution for externalizing your SAP documents?

If you answered YES to any of the questions above, you should consider Gimmel Workplace for SAP®.

- ▶ Store SAP-related documents in Office 365, providing easy accessibility, with the ability to leverage the Microsoft productivity tools to quickly develop and deliver applications around SAP content
- ▶ Gain a cost-effective document archiving solution to get your content out of SAP HANA and keep your database clean to support analytical processes
- ▶ Eliminate the need for a separate enterprise content management (ECM) platform and leverage the Office 365 licenses you already have

For a limited time, Gimmel and Microexcel Inc. are offering the opportunity to try our solution with our Jumpstart Package and verify the functional and cost benefits for yourself! For \$25,000, Gimmel and Microexcel will provide a full license and implementation of **Workplace for SAP** valid for use with two (2) SAP Business Objects¹. For example, you can select business objects to manage Purchase Orders or Invoices more efficiently and effectively, or business objects to make Plant Maintenance content more easily accessible. You select the business processes that will bring the most value to your organization, and we'll help you make that a reality.

¹ For a single SAP production instance and for use for up to 100 users. The annual subscription fee of \$17,000 and an \$8,000 configuration fee requires a 3 year subscription. Also assumes a SaaS implementation in a Microexcel hosted environment.
