

Build a huge collection of description templates to use them as needed on CRM records.

Description Template is a smart add-on from MTC that allows D365/CRM users to build a huge collection of description templates, which can later be populated on any field (only string value allowed) just like that. As a result, CRM users have a great variety of choice in selecting the appropriate description for a chosen field.

Advantages & Benefits:

- Easy to configure
- Flexibility to choose the right description template
- Saves time & energy
- Gives a professional look to CRM records
