

Get training and a proof of concept all in one

Prosoft's philosophy to training is based around two pillars. First, is experience; Students need to work with the product in a meaningful way. The second is focusing the course so that students can leave our class and be able to start working right away with the product

Prosoft's: Your App Jumpstart

Your App Jumpstart is a course designed around the idea that your team needs to make a proof of concept for an application but they still need to learn Dynamics 365. Your App Jumpstart focuses the activities around **your** proof of concept requirements for lab exercises. In the end you get a trained team and a proof of concept!

Why customers use Prosoft Systems Intl.

- On-site / On-Line
- Highly experienced instructors
- In-Depth classes
- Certification Prep

Team Building

- **Customizer vs. Developer centric models**
- **Allocate activities to effectively create your proof of concept**

Capstone Activity

- **All Prosoft classes contain a capstone activity that encapsulates and reinforces the learning objectives.**

Certification

- **Prepares students for certification exams**

Doing the final project. It allowed me to visualize how the work I am doing gets implemented into the system.- Student
