Extracting intelligent business insights from your complex & massive data volumes

Mobility

Building highly scalable cross-platform mobile apps across all platforms with Xamarin

Cloud

Solving complex business problems with Azure PaaS, IaaS, Agile & Lean Expertise

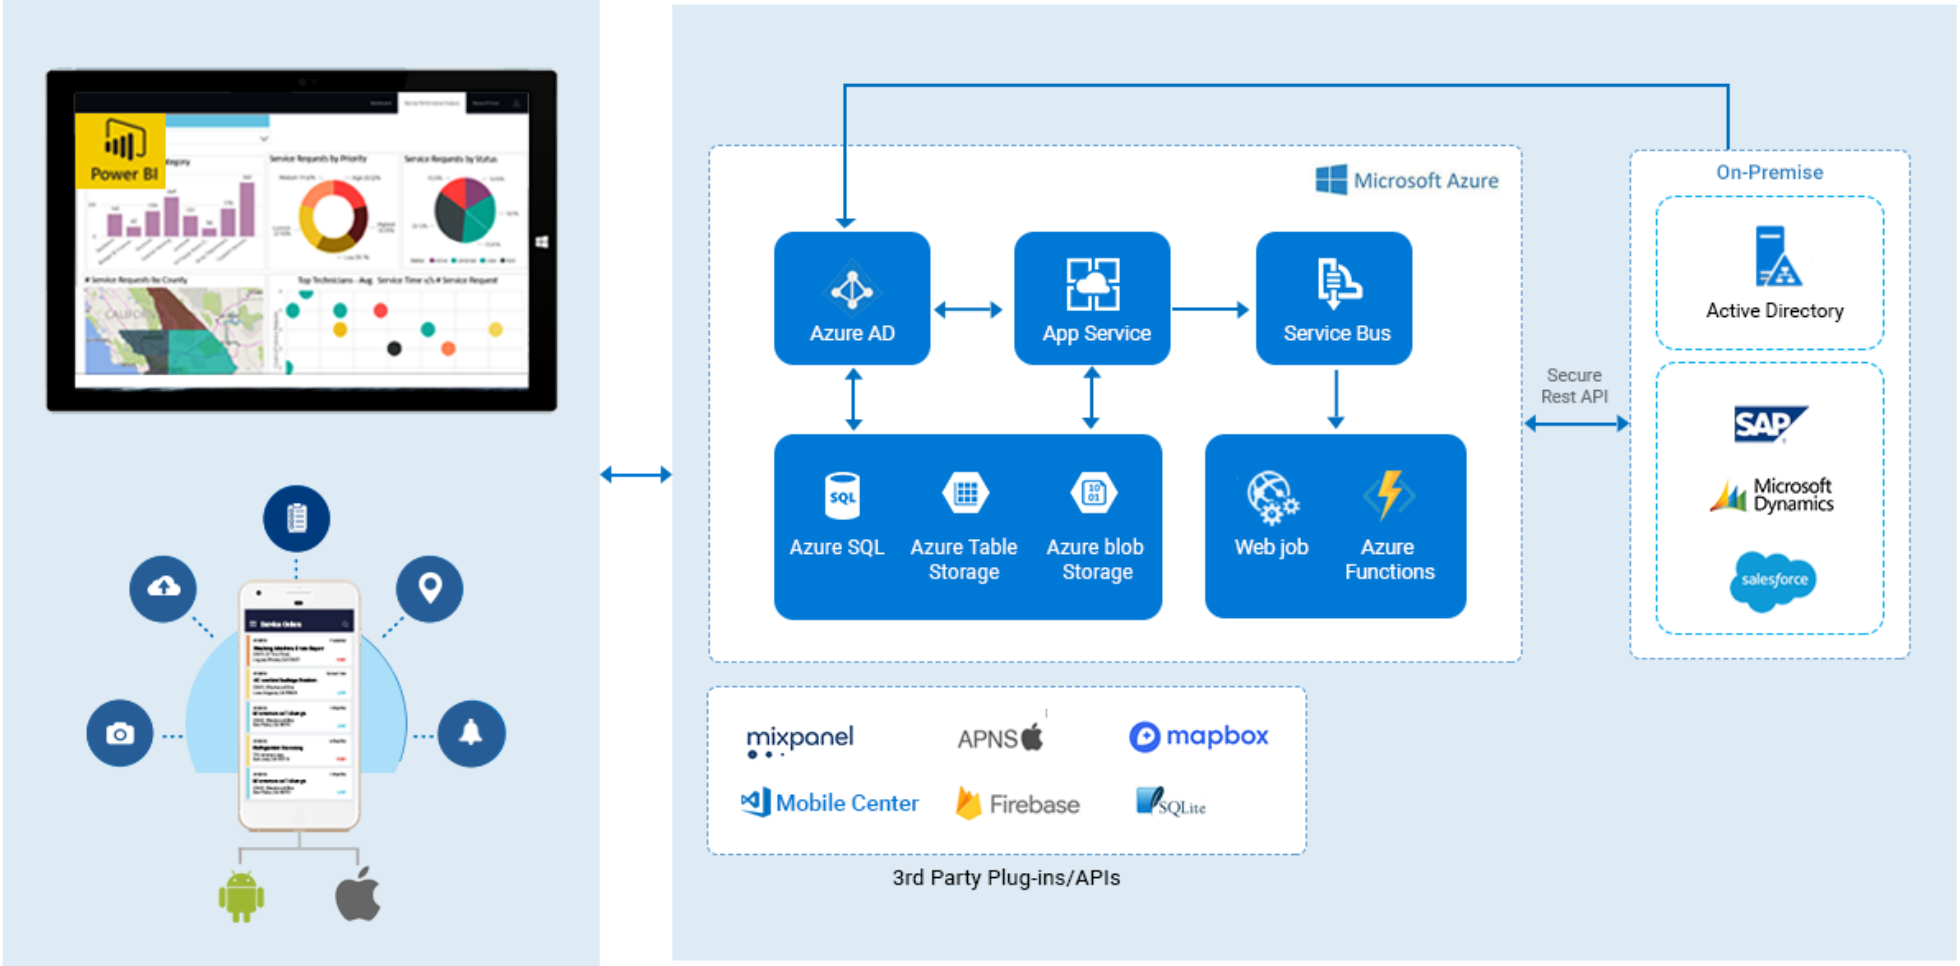

About X-Core

- Saviant's X-Core app, is a Mobile First Architecture built using Xamarin and Azure. X-Core enables Industrial Enterprises to go-live with cross-platform Mobile Apps, in less than 4 weeks, for managing their operations, workforce, data and work orders in remote locations.
- Saviant's X-Core, a ready to use Field Service Management framework, is available for industrial enterprises to improve their workforce productivity and efficiency.
- It helps enterprises achieve real-time visibility of field operations and successfully manage end-to-end field operations.

X-Core Features

- **X-Core provides the following features which helps improve workforce productivity and efficiency:**
 - Job scheduling in real-time and work-order management.
 - Location visibility with route display & vehicle/driver tracking.
 - Spare parts management.
 - Upload proof of work by means of photos & signature.
 - Extended battery life of more than 10 hrs.
 - Log and view labor hours.
 - Real-time chart view for service history and statistics
 - Data management via local data storage

Architecture

Business Benefits

- Comes with pre-built components and UI Templates across platforms
- Dedicated platform for Field Mobility Service Order Management
- Enables offline data sync along with online capabilities
- Comes loaded with Calendar & Scheduling components for streamlining field operations
- Enables location tracking, real time notifications (email/push), and has invoicing capabilities.
- Its size is less than 10 MB, and has the potential to provide extended battery life of more than 10 hours.
