

Business Central 1-Hr Manufacturing Assessment

Silverware Microsoft Dynamics 365 Products

Business Central (ERP)

Office 365

Customer Engagement (CRM)

Power BI

Power Apps

Join Silverware, Inc. for a manufacturing-focused assessment to determine if Business Central is the right ERP solution for your company.

This 1-hr workshop is for technical / business leaders and hosted in a private online webinar.

Agenda

- Assess your readiness to transition from QuickBooks and spreadsheets to a fully integrated ERP solution
- Compare your processes and system against functionality within Business Central to identify software fits and gaps
- Design a high level Business Central implementation plan to support your transition to a high-performing manufacturing business

Deliverables

1. A clear understanding of how Business Central is suited for your processes
2. Next steps to improve your manufacturing business

Business Central Benefits for Manufacturers:

1. Plan proactively with production scheduling and materials requirements planning (MRP) to procure the necessary materials
2. Track costs of machines, raw materials, and labor to understand your cost per unit
3. Use the same system to manage a complex multi-vendor/multi-location supply chain
4. Consolidate data from all departments for real time analysis
5. Trace customers through the sales cycle for enhanced customer service
6. Build accurate data stories to measure financial success
7. Create a single point of the truth
