

P2P Express – SharePoint PowerApps & Flow – Copy and Reuse

Have you been frustrated because you can't easily reuse or move a PowerApps and Flows you embedded in a SharePoint list? Maybe you have tried searching through countless blogs and even tried to update JSON files and GUID's. And then, after all of that, you have to recreate SharePoint Lists and references to these new lists in Flow and PowerApps.... so much manual, tedious, error-prone work. There must be a better way.

Today is a good day for you - your search has ended.

SkyLite Systems has created a new tool that lets you easily move or reuse embedded PowerApps and Flows and their associated SharePoint lists. You can complete the necessary steps in 5 minutes or less. Our new P2P Express offer includes the following:

- P2P Express leads you through 7 steps to quickly “clone” necessary SharePoint lists and easily copy or reuse a PowerApp and associated Flows embedded into a SharePoint List.
- P2P Express supports Application Lifecycle Management or Reuse of PowerApps and Flows embedded in a SharePoint list.
- Each sales of P2P Express includes 2 hours of consulting to assist set up and migration.
