

Health Care / Clinical Trials Analysis

Assessment for Clinical Trials Analysis

Analysis of data for clinical trials is key for success. When doing clinical trials, different data, from different sources and formats must be gathered and cleansed to perform analysis.

SolidQ health care practice has helped non-for-profits, clinical trials organizations, and government programs analyze their data for better operations, decision making, and portfolio management.

This assessment would help you understand, cost, times and value of building an analytical solution with Power BI.

Assessment cost:

Depending on the complexity, volume, systems or areas covered, this assessment may take longer than the estimated initial day. T&E not included.
