

SPR helps you present visual data in a way that helps everyone easily comprehend the insights

Reveal patterns and trends visually, to help you make decisions faster

Understand Your Insights Easily with a Data Visualization Quickstart

Companies need to increase efficiency and make better decisions, faster. Data visualization helps accelerate insight into wisdom, by visually revealing patterns and trends. Business users can interact with the visual data faster, dive deeper into analysis, and easily share data with the right people at the right time.

We provide three training sessions to help you better understand how to use data visualization. Each offering builds upon the previous and provides the right amount of information, based upon the knowledge level of your users.

What's your data visualization maturity level? We have an offering to match.

Consumer

Has some understanding of data visualization tools

1.5 Day Session

Open to all level users, this session uses standard training data to:

- teach basic functionalities of data visualization
- execute common deployment methods and data access methods
- navigate a web-based dashboard for data analysis

Analyst

Some capabilities with toolset, can author data visualizations; tests often

3 Day Session

This offering is open to Analysts and Power Users to learn:

- primary functionalities of data visualization
- practical deployment methods
- access methods that meet your organization's needs
- how to iteratively build and deploy dashboards from various sources

Power User

Highly skilled in data visualization, usually a developer or report author

5 Day Session

Building on the previous offerings, this comprehensive session teaches Power Users:

- the advanced functionalities of data visualization using the desktop toolset and web-based interface
- how to build semantic layers to encourage an enterprise "one-version-of-the-truth" data visualization platform

These onsite sessions are best for business and IT leaders who recognize a need to better visualize data and are looking for ways to get started. **Contact SPR to reserve the data visualization workshop that works for you.**
