

Modern, user-friendly business solutions for the agriculture industry

Built on Microsoft Dynamics 365, a premier, modern, user-friendly platform, Stoneridge Software ag solution is an end-to-end accounting, operations, and customer relationship management solution tailored for agriculture needs.

Stoneridge Software Agriculture Co-ops & Retailers

Stoneridge Software has the only modern solution to integrate core functionality for ag retailers into one system, including: agronomy, grain/commodity, accounting & retail, feed, commodity processing, scale, equity & patronage

Why customers use Stoneridge Software for Ag Retailers

- A modern connected way to run an ag business
- Able to track many data points within one solution
- Information accessible whenever, wherever, by multiple users and relevant roles across many locations
- Industry specific functionality such as the ability to manage split ownership, credit and payments, equity tracking & revolvement & patronage reporting

Agronomy

- Field Mapping & Planning
- Field Contracts
- Field Scouting & Sampling
- Work Orders
- Dispatching & Blending

Access to vital historical information, application and chemical certifications, and licensing and DOT tracking

Grain

- Grain Contracts
- Hedging
- Scale Tickets
- Grain Reporting
- Settlement & Invoicing

Both growers and retailers gain visibility into the entire lifecycle of commodities

Equity & Patronage

- Stock allocations
- Equity Tracking
- Equity Revolvement
- Patronage Reporting

The only ag solution on the market with equity & patronage integrated into the core system

With a recent merger we were faced with consolidating operations and we knew we couldn't move forward with either 20 year-old legacy ERP system currently in use. We badly needed to bring automation to operational processes. Our organization had a commitment to adopt a modern, flexible system, and we found that with Microsoft Dynamics and Stoneridge Software's LevrIDGE solution for ag. - Dan Rosenbaum, Chief Information Officer, Agtegra
