

## Straightforward setup & use

Each Microsoft Dynamics 365 for Finance and Operations system can be individually set up or configured: You are free to define where additional texts are available in the system. Additional texts can be set up at the header and footer level, and above and below the line items.

For all documents, the positioning on the document needs to be carried out according to your wishes and requirements during the document design process. You can use generally applicable and flexible or specific additional texts.

Company wide and/or location-specific provisions can be implemented as well.

We deliver *Sycor.Text* with installation and setup documentation and a user manual so you can carry out the installation and implementation on your own. The solution can be quickly deployed with little effort.

On premise

Cloud

Hybrid

Sycor is an international full-service partner and solution integrator (SI) for Microsoft Dynamics 365 (AX & CRM) and a Microsoft Cloud Solution Provider. The experts consult, implement, optimize and operate cloud, on premises, and hybrid scenarios. For major implementation and rollout projects Sycor is a reliable partner. 700+ employees and 19 locations (Europe, Asia, America) assure international delivery capabilities.

The comprehensive Dynamics 365 portfolio is backed by extensive hosting services (full Microsoft stack) and solutions and services for Microsoft Azure, Microsoft Cortana Intelligence Suite, Power BI, Microsoft Flow, PowerApps, Microsoft Office 365, Microsoft SharePoint, Skype for Business and other online Microsoft products. In addition to that, Sycor offers software asset management and license consulting. Its industry solutions *Sycor.Rental* and *Sycor.Fleet*, as well as *Sycor.Text*, are Microsoft Dynamics 365 solutions and available at the Microsoft AppSource.

## *Sycor.Text*

Easy integration of additional texts in Microsoft Dynamics 365 for Finance and Operations

## Sycor.Text - The simple solution for additional texts in the system and on documents

Would you like to provide your customers with additional information on Microsoft Dynamics 365 for Finance and Operations documents such as quotations, order confirmations, and invoices?

With *Sycor.Text*, we deliver a solution that is simple to implement and use. *Sycor.Text* makes it easy to insert additional texts into Microsoft Dynamics 365 for Finance and Operations documents.

You establish where the additional texts will appear:

In the header or footer of the respective document or even at the line item level.

*Sycor.Text* makes all of the information from the additional texts in the flow of data available for document printing (data provider classes). *Sycor.Text* lets you link master data to additional texts, create predefined modules, or enable manual input to capture individual agreements with customers. Optionally, you can use the additional texts on the documents exclusively for internal communication.

Fast setup & easy usage

## Sycor.Text - overview of the functions:

- **Straightforward and fast integration** of additional texts and links in Microsoft Dynamics 365 for Finance and Operations with the option of printing them on documents
- **WYSIWYG editor** for uncomplicated handling and formatting (paragraphs, bold, underlined, font sizes, etc.)
- **Corporate design** can be maintained (fonts & colors)
- Integration of additional texts in the **header and footer, and at the line item level, in the system and on documents**
- **Predefined text and information modules** (e.g. general business terms and conditions) for repeated use as well as **manual input**
- Manually overwriting predefined modules for just one transaction
- Use of **standardized and specific additional texts at company and/or location level** (e.g. company-wide or regional rebate promotions and special offers, and upcoming trade fairs or other events)
- Icons indicate whether additional texts were integrated and if so, if they are unchanged or have been adapted
- WYSIWYG editor supports the entry of additional texts in all languages: **Sycor.Text is designed for international use**
