

OVERVIEW

A certified winery business solution built with Dynamics 365 Business Central and connected with Dynamics 365 Customer Engagement Apps.

VinoTEC
POWERED BY MICROSOFT

VinoTEC is business software solution for wineries and beverage companies built with Dynamics 365 applications. Its core functionalities are based on Dynamics 365 Business Central, the new brand for the ERP Microsoft Dynamics NAV. It integrates all manufacturing, administrative and commercial stages by providing exhaustive and real-time information for quick and reliable decision-making.

Microsoft Corporation has successfully certified VinoTEC ERP as vertical solution for Dynamics 365 Business Central. It means that solution accomplishes the highest standard requirements for partner-developed software and offers a commitment to functional and technical roadmap of Microsoft's technologies.

VinoTEC ERP capabilities are enriched with other Dynamics 365 applications that contribute to promote customer's engagement, their digital interactions (social media, e-marketing, e-commerce) and data capture and analysis (IoT a Business Intelligence).

Core ERP capabilities include:

- **Financial and accounting management.**
- **Financial and accounting management.**
- **Supply chain management.**
- **Vineyards & parcels Management.**
- **Vintage process management.**
- **Winery management / production process.**
- **Bottling and labelling.**
- **Traceability.**
- **Official Documentation & Taxes**

Extra applications based on customer engagement interactions are also available, like advanced sales & service management (**CRM for wineries**); **digital marketing interaction and promotion**; **e-commerce and social media analysis**; or deep business intelligence analysis via dashboards and strategic KPIs.

ARE YOU INTERESTED IN VINOTEC?

VinoTEC solutions are currently addressed to Spanish and Portuguese markets. However, we are open to explore new markets though cooperation with other Microsoft Dynamics partners who serve local functionalities and support final users.
