

tyGraph for Teams

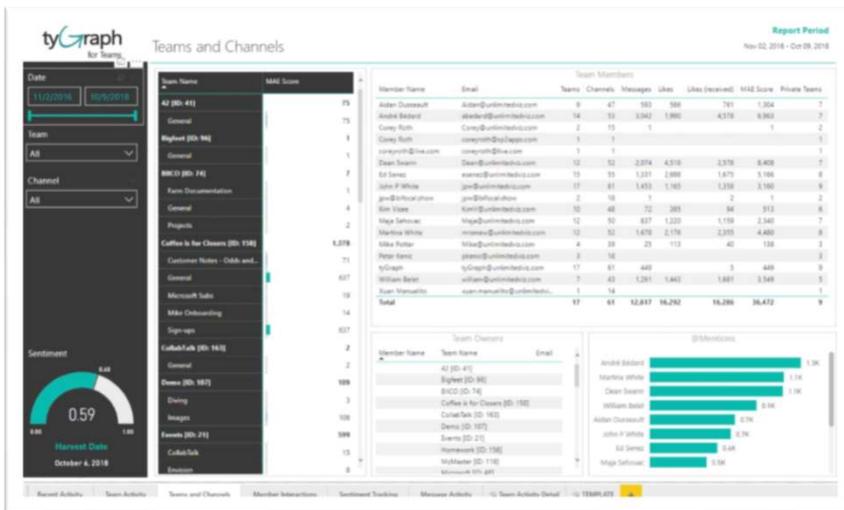

Better understand usage and adoption patterns of Teams in your Enterprise

Microsoft Teams is the fastest growing product in Microsoft history, and users are drawn to its ability to keep conversation in context to business critical applications and processes. However, Companies need help understanding where adoption has happened and how they can best support their user community.

tyGraph for Teams provides rich and meaningful reporting and analytics, allowing leaders to take immediate evidence-based action, maximizing the ROI from their investments.

tyGraph provides more granular visibility into Teams and Channel activity, member interactions, external users, and even sentiment tracking. All Teams data can be augmented with signals from HRIS, such as role, region and organizational structure, for deeper insights into organizational usage patterns.

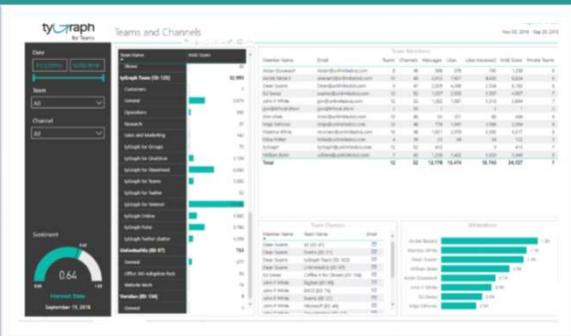

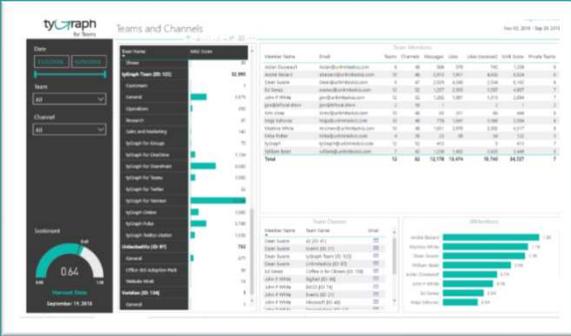

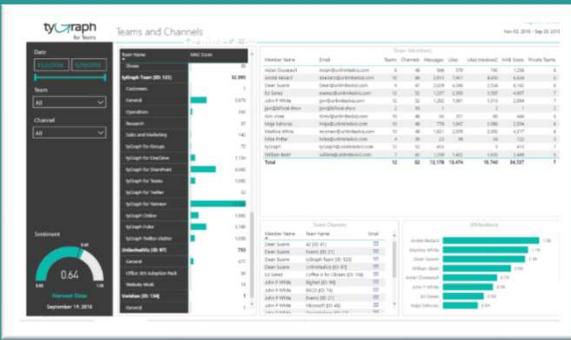

More granular reporting, more actionable insights

Organizations love that Microsoft Teams has full access to the data within the Office Graph, and maintains the same enterprise-level security, compliance, and manageability as the rest of Office 365. Combined with tyGraph for Teams, companies attain even more granular insights into the data provided through Teams.

tyGraph takes the unrealized potential within your Office 365 network and converts it into the measurements and dashboards that allow your leadership team to make timely, evidence-based decisions.

- **Message Activity:** Get right to all the message activity happening in Teams with on-page slicers to find messages by Teams, Channels, Member Name, External / Internal, or Office Location.
- **Filter by Time:** Each report page includes time slicers to report on specific time periods.

Better Manage the Growth of Office 365 using tyGraph

As a hub for teamwork, Microsoft Teams can be a powerful platform for collaboration and communication. However, managing such a complex set of apps and tools without the cross-workload visibility that tyGraph provides can be daunting.

tyGraph customers see an average increase of 40% in adoption rates because “what gets measured gets managed.” Make analytics part of your overall digital transformation strategy and see the results for yourself!
