Milestone Tracking

VISIONET

Simplify purchase, production, and logistics management in Dynamics 365 for Finance and Operations

An efficient supply chain ensures that your products are delivered to your consumers with short lead times and low costs. Visionet's Milestone Tracking provides tighter control and deeper vendor collaboration across your supply chain through hands-on production calendars, and purchase and logistics milestone management functionality.

Microsoft
Dynamics 365

The Tracking Process

Configure milestone template

Generate milestone calendar

Purchase milestone calendar setup

PO & calendar confirmation

Factory milestone status update

Forwarder milestone status update
