

# KickStart for Dynamics 365 Project Service

WICRESOFT

Microsoft Dynamics 365

Microsoft

KickStart for Project Service includes best practices, tools, resources, and experts committed to making your experience with Project Service a success.

## 1 Get To Know Project Service

Test drive Project Online leveraging your own teams, processes and data. Find out if Project Service is the right fit for your organization before you make the investment.

## 2 Gain Executive Buy-in

The KickStart program enables management to easily understand the solution's capabilities, and visualize the immense value that the solution can provide.

## 3 Evaluate Project Online

PPM tool evaluation is a given but where do you start? The most effective approach is to pilot key aspects of the desired solution without the need to make any significant investments.

## 4 KickStart Your Deployment

Ready to deploy Dynamics 365 Project Service? Get up and running quickly with prebuilt solutions, best practices and business apps. Wicresoft has all the tools you need to prove value quickly

## Get up and running in as little as four weeks!

The **KickStart for Project Service** program leverages a pre-configured solution, reports based on best practices and a proven deployment approach to get you started fast with a fully working Dynamics 365 for Project Service environment.
